Volume 232 November 1991

## CONTENTS

Internal wave–vortical mode interactions in strongly stratified flows. M.-Pascale Lelong and James J. Riley *page* 1

Flow past a constriction in a channel: a modal description. G. G. Tomasson and W. K. Melville 21

Low-frequency pressure oscillations in a model ramjet combustor. Ken H. Yu, Arnaud Trouvé and John W. Daily 47

Eddy-viscosity and drag-law models for random ocean wave dissipation. S. L. Weber 73

Vortex-induced boundary-layer separation. Part 1. The unsteady limit problem $Re \to \infty$. Vallorie J. Peridier, F. T. Smith and J. D. A. Walker 99

Vortex-induced boundary-layer separation. Part 2. Unsteady interacting boundary-layer theory. Vallorie J. Peridier, F. T. Smith and J. D. A. Walker 133

Stokes flow past a pair of stagnant-cap bubbles. L. Lerner and J. F. Harper 167

Stretching and breakup of droplets in chaotic flows. M. Tjahjadi and J. M. Ottino 191

A pairwise interaction theory for determining the linear acoustic properties of dilute bubbly liquids. A. S. Sangani 221

An asymptotic theory of near-field propeller acoustics. N. Peake and D. G. Crighton 285

Use of flow visualization data to examine spatial–temporal velocity and burst-type characteristics in a turbulent boundary layer. L. J. Lu and C. R. Smith 303

Analysis of swimming three-dimensional waving plates. Jiang-Yu Cheng, Li-Xian Zhuang and Bing-Gang Tong 341

The linear inviscid secondary instability of longitudinal vortex structures in boundary layers. Philip Hall and Nicola J. Horseman 357

A turbulent flow over a curved hill. Part 2. Effects of streamline curvature and streamwise pressure gradient. V. Baskaran, A. J. Smits and P. N. Joubert 377

Testing continuum descriptions of low-Mach-number shock structures. Gerald C. Pham-Van-Diep, Daniel A. Erwin and E. Phillip Muntz 403

The unsteady laminar boundary layer on an axisymmetric body subject to small-amplitude fluctuations in the free-stream velocity. Peter W. Duck 415

Free-surface effects on the spin-up of fluid in a rotating cylinder. James O'Donnell and P. F. Linden 439

Model computations of the influence of carbon impurities on the ionization relaxation in krypton shock waves. D. Klages and F. Demmig 455

Analysis of turbulence in the orthonormal wavelet representation. Charles Meneveau 469

Symmetry breaking in vortex-source and Jeffery–Hamel flows. M. Goldshtik, F. Hussain and V. Shtern 521

An experimental study of the parallel and oblique vortex shedding from circular cylinders. H. Hammache and M. Gharib 567

Structure and mechanism of oscillatory convection in a cube of fluid-saturated porous material heated from below. Michael D. Graham and Paul H. Steen 591

The onset and development of circular-cylinder vortex wakes in uniformly accelerating flows. Tim Lee and Ralph Budwig 611

Chaotic streamlines inside drops immersed in steady Stokes flows. H. A. Stone, Ali Nadim and Steven H. Strogatz 629

Vortex instabilities in three-dimensional boundary layers: the relationship between Görtler and crossflow vortices. Andrew P. Bassom and Philip Hall 647

Variational approximations for gravity waves in water of variable depth. John Miles 681

Corrigendum 689

Reviews

*Vortical Solutions of the Conical Euler Equations, by K. G. Powell* 691

*Wing Theory, by R. T. Jones* 692
